HIGH TECHNOLOGY & MAXIMUM BREATHING COMFORT WITH SCUBAPRO REGULATORS

SCUBAPRO FIRST STAGE REGULATORS

First stage regulators are divided into piston & diaphragm categories.

SCUBAPRO PISTON TECHNOLOGY

The general advantage of a piston first stage lies in its reliability & reduced maintenance requirements. More importantly, no other design can reach the high air delivery rate of a balanced piston controlled first stage. First stages with air-balanced pistons deliver significantly more air to the second stage than any other first stage. This technology is featured in our MK25 EVO first stages.

Classic downstream piston - The classic downstream valve is the first choice of diving centers & rental facilities worldwide for warm & moderate water temperatures. This technology is featured in our MK2 EVO first stage.

• SCUBAPRO DIAPHRAGM TECHNOLOGY

Diaphragm-based first stages are environmentally sealed so water cannot enter the inner mechanism. Diaphragm first stages have been the favored choice of cold water divers & those working in contaminated or muddy water. This technology is featured in our MK17 EVO & MK11 first stages.

• SCUBAPRO SECOND STAGE REGULATORS

A high quality second stage can significantly reduce stress & enhance diver safety by providing a smooth, low-effort breathing response, resulting in ample yet controllable quantities of air.

• AIR-BALANCED VALVE TECHNOLOGY

The air-balanced valve technology of SCUBAPRO second stages features a balancing chamber in the second stage mechanism, slightly offsetting the force of the downstream air entering from the first stage. Air-balanced valve technology is featured in X-Series, S-Series & G-Series second stages. For best results, they should be teamed with balanced first stages like the MK25 EVO or MK17 EVO.

MK25 EVO / A700 CARBON BLACK TECH

X12.770.700
45,640.-

First stage

- DLC (Diamond-like Carbon) black finish
- Cold water XTIS (external thermal insulating system)
- Improved cold water performance by 30% in waters down to 2°C

Second stage

- Precision handcrafted construction (full metal case)
- NEW carbon fibre cover that's virtually bulletproof
- Exceptional breathing performance at any depth
- Diver adjustable venturi-initiated vacuum assist (VIVA)
- High comfort orthodontic mouthpiece

- 0.5mm nylon neoprene outside for durability & Silverskin inside for easy wear. Silverskin is an ultra-smooth interior finish. It consists of a cell finish with 'metalite' coating for extra warmth retention. It dries fast & seals extremely well. It is also used on hood & glove interiors
- Non-chaffing flat seams for insured comfort directly against your skin. Flat seam construction is a stitching pattern that provides comfort, strength & flexibility on warm water suits
- Thumb & foot straps, for added convenience
- Back zipper for great ergonomics
- Men's & women's dedicated sizes & colours

- Made from X-Foam neoprene, the only "green" neoprene that complies with P.A.H. regulations
- The "body map" system uses special tailoring & material inserts to compensate for the stresses of the human body
- Ultraspan chest panel & Stretchtec side panels work together to produce a highly flexible & snug fit
- Infrared (IR) fleece interior lining reflects body heat for extra thermal insulation & is extremely soft against the skin
- Zippered seals at wrists & ankles plus a rear diagonal zipper block water entry, are comfortable & make the suit easy to put on & take off
- Abrasion resistant fabric on shoulders & seat, along with elbow pads & kneepads, increase long-term durability
- Spine pad cushions the tank, providing a ditional comfort during extended dives
- Small neck zipper enhances topside comfort, eliminating the need to remove the suit between dives
- I-Safe strap keeps a wrist instrument securely attached

- Made with 100% Everflex neoprene and are assembled using solvent-free water-based Aqua glue.
- Multi-thickness panels deliver a superior combination of warmth and flexibility.
- The Innovative Pure Design Concept uses fewer seams and panels for maximum range of motion.
- Double blind-stitched outer seams, and single blind-stitched inner seams are durable, watertight and comfortable against the skin.
- The Diamond Span inner lining's water-draining material enhances cold water protection and improved stretch.
- Wrists and ankles feature fuse-cut finished cuffs that are super-stretchy.
- A small neck zipper enhances topside comfort.
- Diagonal rear YKK zipper with brass slider offers increased long-term durability and ease of use.
- Compression-molded zipper flap/spine pad reduces water entry and increases back protection.
- Tatex knee and shoulder pads offer protection against abrasion.
- Seat area is protected by an abrasion-resistant outside lining to increase durability and extend the life of the suit.

AIR STORAGE & PURIFICATION B-KOOL

The B-KOOL refrigeration dryer from BAUER considerably reduces the running costs of the compressor whilst protecting the environment at the same time.

At locations with particularly high ambient temperatures, B-KOOL assures a remarkably longer life time of the filter cartridge. You will benefit from a lower cost of purchase & storage of filter cartridges, a longer uninterrupted compressor operation & a lower consumption of filter cartridges.

- 200 - 680 l/min
- 100 - 350bar
- Up to 11 times longer life for your filter cartridges!
- Environmentally sound
- Integrated or as stand-alone version
- Easy to retrofit

The **POSEIDON EDITION** represents an excellent value-for-money range of compressors without compromising typical **BAUER** quality. This product range has been developed for uncomplicated operation, combining proven core components from **BAUER** with a simple but robust chassis.

- 300 - 850 l/min
- 225 / 330 / 420bar

The new generation VE range excels through its high delivery rates of up to 850 l/min. Tailored for breathing protection & scuba diving requirements, the new compressor control offers quick & easy access to all important functions.

- 250 - 300 l/min
- 225 / 330bar

The PE-MVE is BAUER's compact all-in-one solution, offering high quality at outstanding value for money. Standard with Super Silent housing, automatic condensate drain system & the user friendly BHW-CONTROL control unit.

- 200 - 300 l/min
- 225 / 330bar

The PE 200 - 300-TE models offer the optimum weight / price ratio. Owing to their compact construction, the units are easy to transport & to load onto vehicles.

- 100 l/min
- 225 / 330bar

The PE 100 is the smallest & lightest compressor unit of the PE range. With its three drive variants (petrol, three-phase & single-phase alternating current).

- 200 - 300 l/min
- 225 / 330bar

The PE 200 - 300-HE horizontal models are by far the most compact high pressure breathing air compressors in their class. The standard version comes already equipped with automatic condensate drain & easy-to-use control. Ideal for use on dive boats

INDIAN OCEAN REEF GUIDE

by Helmut Debelius

Maldives - Sri Lanka - Thailand
South Africa - Mauritius
Madagascar - East Africa - Seychelles

The author made his first dives in tropical waters around Sri Lanka 25 years ago. Since then he explored virtually the entire Indian Ocean with his camera, diving not only in the tourist centers like the Maldives or Seychelles, but also taking UW-Photos at remote islands like Cocos-Keeling in the East or Aldabra in the West. The results are shown in this book including more than 1,000 photos from the natural habitat of the marine animals. Special emphasis was given to rare species like sharks & rays.
